CCAS	APRIL	MAY	Performance Update
We will visit you once a year to complete a support plan			During April and May 185 support plans were completed. Commencing in July 2007 a detailed programme, with monthly targets, will get underway to ensure all support plans are completed within the target timescale.
We will answer 98.5% of all calls in one minute			The 98.5% target was achieved in April. In May 98.4% was achieved which is just short of the target.
In an emergency, if you need a mobile warden, they will reach you within 30 minutes of receiving the call in 90% of cases.			The local target was not achieved with 82% of emergencies reached by a mobile warden within 30 minutes of receiving the call. National Telecare Standards for this indicator has a response time of 60 minutes and if this were adopted the service would have a performance level of 98.90%. In order to improve performance on the local target procedures for dealing with night time calls are being reviewed in relation to the introduction of lone worker monitoring.
